Wireline Broadband Service Only

25 Mbps Download/ 3 Mbps Upload

Illinois Department of Commerce
& Economic Opportunity
OFFICE OF BROADBAND
JB Pritzker, Governor

Published June 30, 2021

Broadband data are developed from a combination of direct provider outreach and data collection, FCC Form 477 broadband deployment filings, verified consumer broadband feedback, and independent research conducted by Connected Nation. If a broadband provider was unwilling or unable to supply granular data and a detailed service area could not be developed, the provider service availability is represented by FCC Form 477 data, which tends to be overstated.

This map is not a guarantee of internet service availability. Mobile and satellite services may also be available.

The current FCC definition of broadband is a minimum speed of 25 Mbps (Megabits per second) download and 3 Mbps upload.

Please submit feedback regarding any possible mapping inaccuracies to broadband@illinois.gov.
